David had twelve model cars. He had made each one by himself. First, he put the cars together. Then he painted each car. It took him two hours to make each car. He took four cars to school. He put them on the edge of a shelf. All four cars fell off and broke in many pieces. David blamed Ava for breaking his cars when she put her books on the shelf. His teacher said he had put the cars too close to the edge of the shelf, so he should blame himself. How many cars does David have left?
