A year on Mars lasts 687 days. Robot Pete lives on Mars. He is exactly 2 Mars years old. That means he was born 1,374 days ago, assuming a robot was born, which makes no sense.

But who cares!

Robot Pete's older brother Jack was born 466 days before Pete. How many days old is Jack? Don't forget, to be older, Pete should be MORE days old than Jack! If your answer is less than 1,374 then think again.

April is 65 inches tall. Rosa is exactly 5 feet tall. Who is taller? By how much?
