Erin is at the toy store, and she brought her money to spend. She has 4 ten dollar bills and 15 five dollar bills. She wants to buy a toy that costs \$29.18 and a fidget spinner that is in the final sale section for only 81 cents. There is no tax at this store. She wants to prepare the bills to give the cashier before she goes there. Which bills should she take out of her wallet?

Jenna collects squishies. Before she started getting serious about collecting, she only had 9 of them. But now she has 25 squishies. She ordered 6 really big squishies online. They should be delivered next week on her birthday. And guess what? Next week on her birthday, she invited 4 friends over for a slumber party. In the invitation she said, "No gifts. Just give me 3 squishies."

On the day after her birthday, how many squishies will Jenna have?

How many hours are there from 9 a.m. to 4 p.m.?

This puzzle has a large number in the middle, which is the sum of the four numbers that surround it.

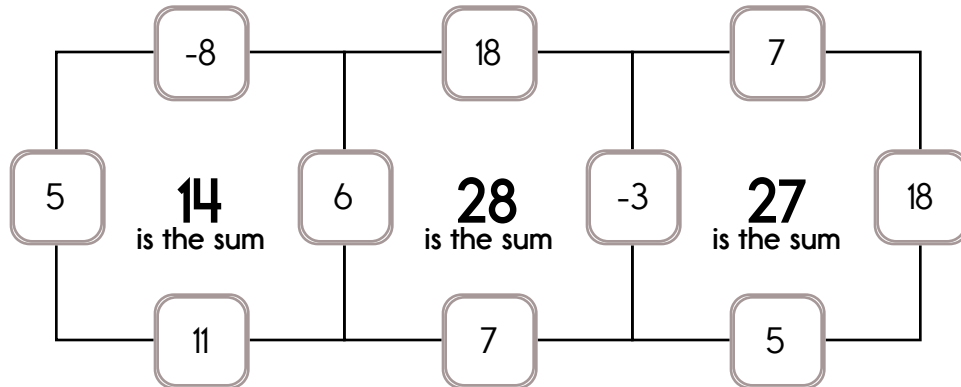

Example:

$$5 + 6 + 11 - 8 = 14$$

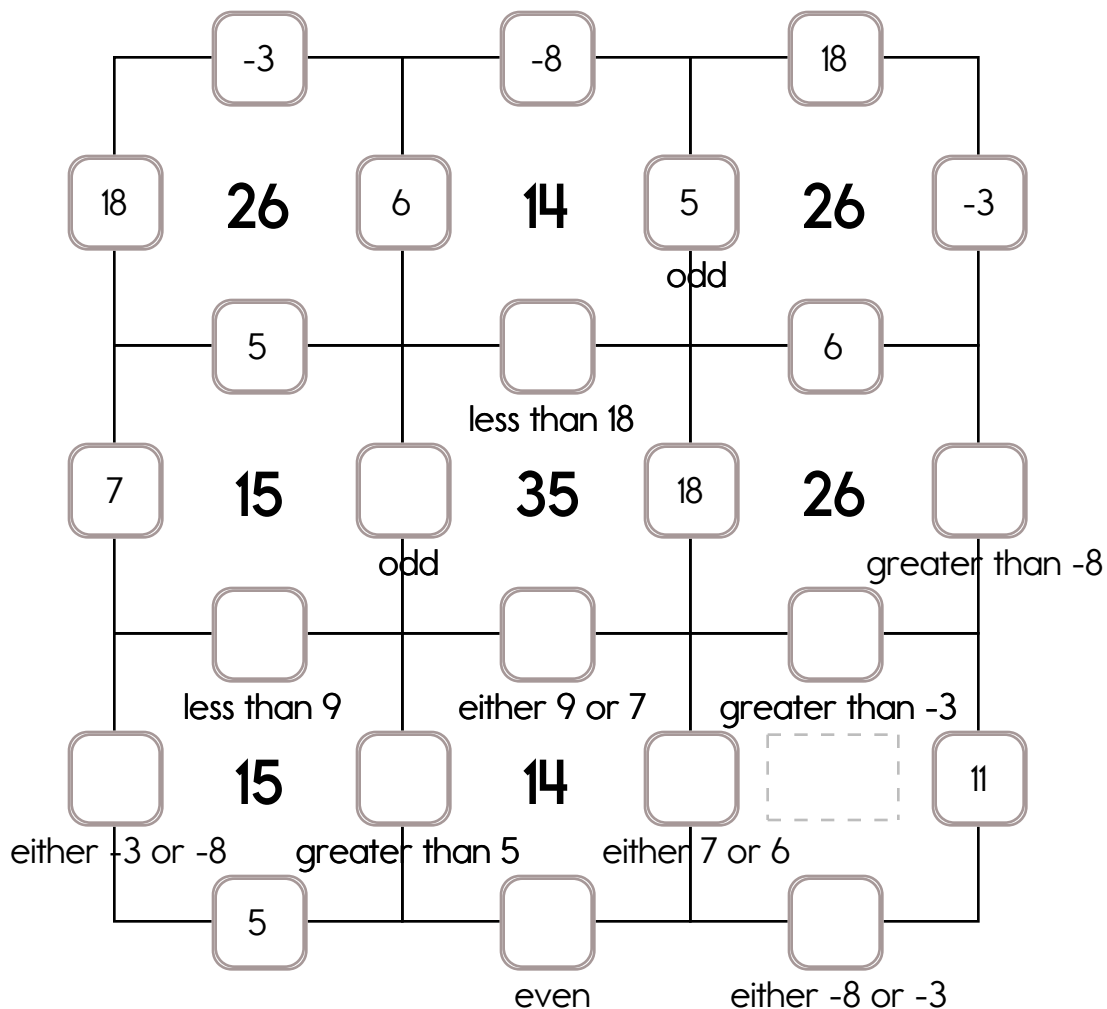

Example:

$$18 + 7 + 5 - 3 = 27$$

Sample:

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square. Exactly one of the four numbers has to be one of these numbers: -8, -3, or -1. The other three numbers have to all be DIFFERENT and must be from these: 9, 18, 5, 11, 6, or 7.
