Nathan went to the zoo. He wanted to see the penguins. There were 5 different kinds of penguins. There were 7 of each kind of penguins. How many penguins were there in all?

Miss King is reading a book about weddings. She has read to page 77. There are 49 more pages in the book. How many pages are in the book in all?

Holly took home some pictures she drew at school. She found tape to put the pictures on the wall in her room. Each picture needed four pieces of tape. She used 48 inches of tape. Wow! That's a lot of tape. How many pictures did she put up. Oh, wait. You don't have enough information. Each piece of tape was 3 inches.

Holly collects squishies. Before she started getting serious about collecting, she only had 6 of them. But now she has 33 squishies. She ordered 8 really big squishies online. They should be delivered next week on her birthday. And guess what? Next week on her birthday, she invited 6 friends over for a slumber party. In the invitation she said, "No gifts. Just give me 3 squishies."

On the day after her birthday, how many squishies will Holly have?
