Jacob took 2 quarters, 6 dimes, and 3 pennies to the store. He bought a book about Peter Rabbit. Show the same amount of money using the fewest coins. Draw and label the coins.

Kevin bought a book of Smiley stickers. He wanted to give a sticker to everyone that wasn't smiling during Humor Month. There were 75 stickers. The stickers were divided evenly on 5 pages. How many stickers were on each page?

Mrs. Taylor wrote the numbers 7 and 42 on the board. She always had a weird way to teach math. "Now, class," said Mrs. Taylor. "My printer is broken. Please write your own math problem using these numbers."

Sarah is putting together goodie bags for her birthday party. She invited 6 friends, and everyone can come except for April. At the party store, she bought 7 temporary tattoos. She wants to give everyone an equal number of temporary tattoos. How many should she put into each goodie bag?
