Name: _____

Eric and his family are going to Japan next summer. They will leave sometime during the week of June 5-11. What is the chance they will leave on Monday?

There are 221 books to put on shelves. If each shelf will hold about 9 books, how many shelves will it take to hold all the books?

Emily and Jessica have a playdate at the indoor swimming pool. They did laps to get ready for the summer swim team. Emily did a lap every 2 minutes. Jessica did 3 laps every 5 minutes. After 35 minutes who finished the most laps? Do not count partial laps. By how many more?

"Fine," said Pam to her brother Gavin. "I'll let you have my Legos for a dollar, but you will have to walk the dog for me this week."

"Deal!" said Gavin. He went to his room to get a dollar bill, but all he had was coins. "How did that happen?" he thought.

He counted 5 dimes, 16 pennies, and 6 nickels. Does he have enough money?

If he does, what should he give Pam?

If he does not, how much money does he need?

Name: _____

<p>Nathan will give 2 cans of Play-Doh to each of his brothers. How many cans of Play-Doh will he need for 4 brothers?</p>	<p>Amy has 2 coins. They equal 50¢. Find a clock. What time is it right now?

Name: _____

This puzzle has a large number in the middle, which is the sum of the four numbers that surround it.

Example:

$$12 + 11 + 13 - 1 = 35$$

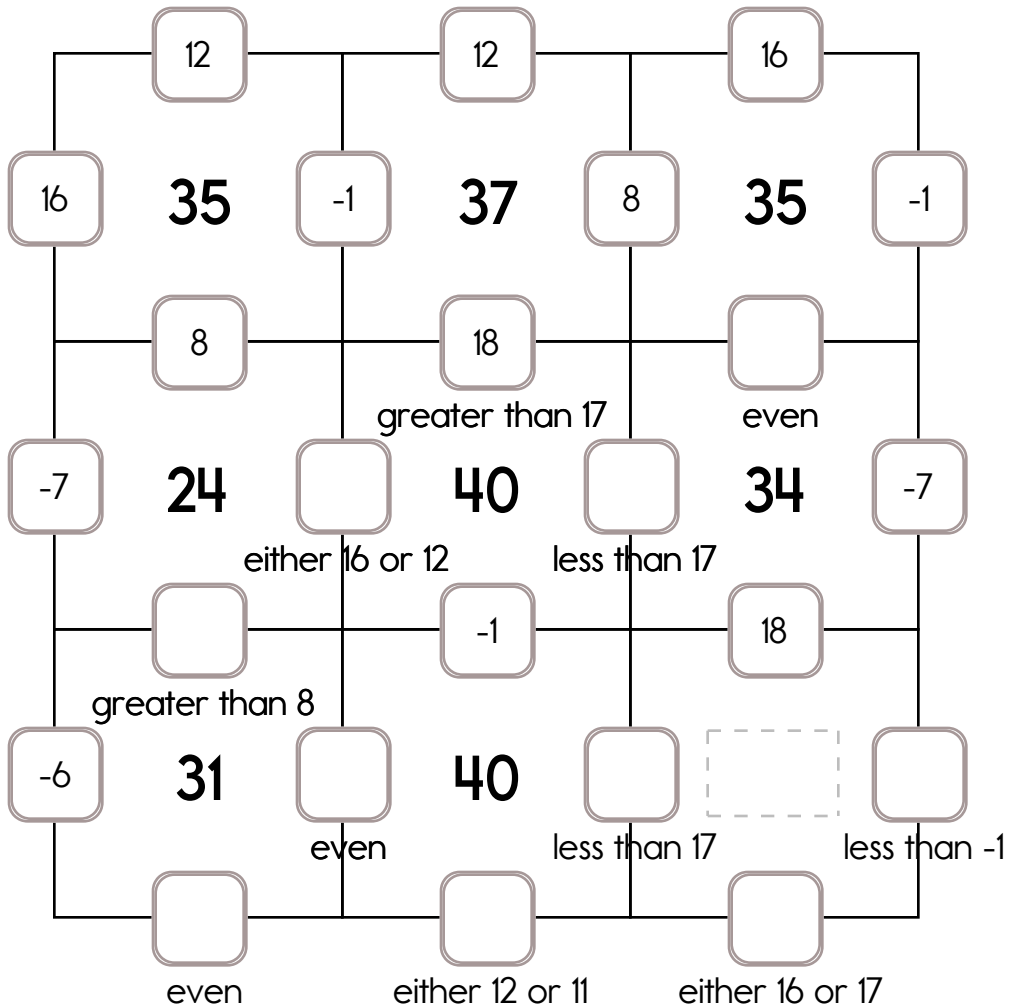

Example:

$$13 + 12 + 11 - 7 = 29$$

Sample:

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square. Exactly one of the four numbers has to be one of these numbers: -7, -1, or -6. The other three numbers have to all be DIFFERENT and must be from these: 13, 16, 18, 11, 12, 17, or 8.

Name: _____

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square. Exactly one of the four numbers has to be one of these numbers: -5, -8, or -9. The other three numbers have to all be DIFFERENT and must be from these: 11, 17, 9, 18, 16, 8, or 5.
