Just give me 2 squishies."

On the day after her birthday, how many squishies will Rose have?

A year on Mars lasts 687 days. Robot Pete lives on Mars. He is exactly 4 Mars years old. That means he was born 2,748 days ago, assuming a robot was born, which makes no sense. But who cares!

Robot Pete's older brother Jack was born 380 days before Pete. How many days old is Jack? Don't forget, to be older, Pete should be MORE days old than Jack! If your answer is less than 2,748 then think again.
