Show what 8×3 looks like by drawing an array. What is the answer?

A year on Mars lasts 687 days. Robot Pete lives on Mars. He is exactly 4 Mars years old. That means he was born 2,748 days ago, assuming a robot was born, which makes no sense. But who cares!

Robot Pete's older brother Jack was born 419 days before Pete. How many days old is Jack? Don't forget, to be older, Pete should be MORE days old than Jack! If your answer is less than 2,748 then think again.

Letters Kissing

Each uppercase letter needs to kiss the same letter but in lowercase.

Draw a line that connects one letter to one other letter to kiss. Draw your lines over the trace lines. No lines may cross. Once you draw a line to a letter, that letter cannot be used again.

One complete line has already been drawn for you.
