You should only mark TRUE if you are absolutely sure it is correct!

Name: \_\_\_\_\_

Ack! Sara forgot how to unlock her phone, but it has a special unlock program. The program says that the unlock code is 3 digits. All the digits are different numbers. The digit in the hundreds place is 1 more than the digit in the tens place. The digit in the tens place is 1 less than the digit in the hundreds place. Any number that fits the above rules will work. Can you name one number that will work?

Compare these numbers and write something about them, such as why they are similar or different.
