

Name: _____

Maria collects squishies. Before she started getting serious about collecting, she only had 7 of them. But now she has 35 squishies. She ordered 8 really big squishies online. They should be delivered next week on her birthday. And guess what? Next week on her birthday, she invited 6 friends over for a slumber party. In the invitation she said, "No gifts. Just give me 2 squishies."

On the day after her birthday, how many squishies will Maria have?

Rose cannot sleep so she is counting by 4s. She started with 4, 8, 12, and kept going. Circle the numbers she might have said before falling asleep. Cross off the numbers she definitely did NOT say.

45 82 48

29 16 59 32

Name: _____

This puzzle has a large number in the middle, which is the sum of the four numbers that surround it.

Example:

$$10 + 5 + 18 - 2 = 31$$

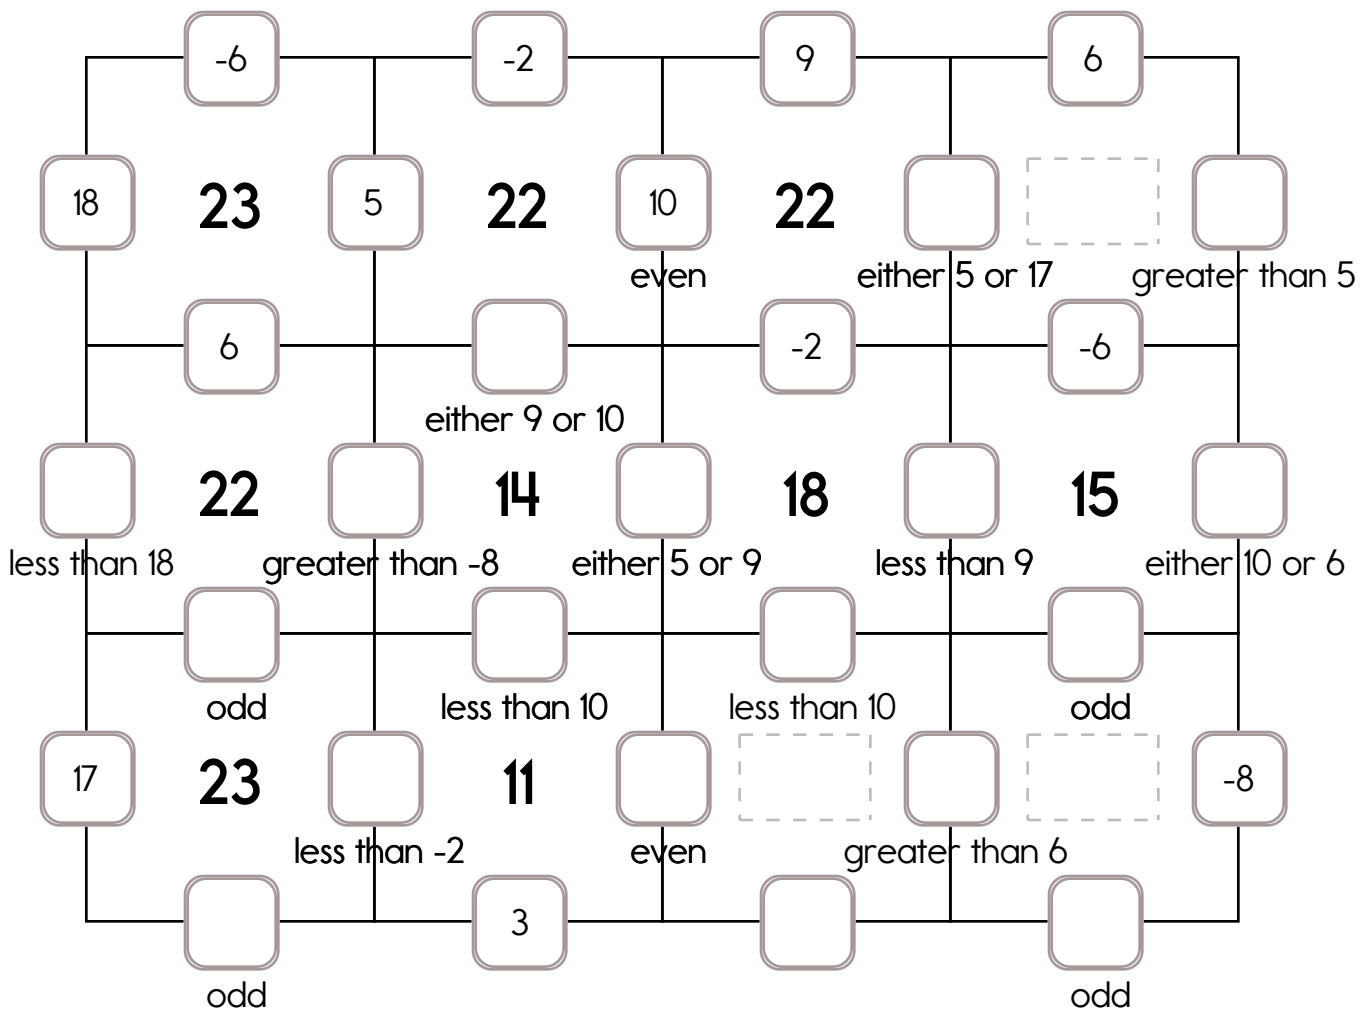

Example:

$$17 + 5 + 6 - 2 = 26$$

Sample:

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square. Exactly one of the four numbers has to be one of these numbers: -2, -6, or -8. The other three numbers have to all be DIFFERENT and must be from these: 10, 17, 18, 3, 6, 9, or 5.

Name: _____

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square.

Exactly one of the four numbers has to be one of these numbers: -5, -7, or -2.

The other three numbers have to all be DIFFERENT and must be from these: 6, 7, 13, 9, 16, 14, or 10.
