Cross out the number you use above and then write it below.

Name: _____

$$6 \overline{) 15642}$$

$$9 \overline{) 1818}$$

$$8 \overline{) 49741}$$

$$4 \overline{) 824}$$

$$3 \overline{) 235165}$$

$$7 \overline{) 4721}$$

It was 6 degrees above zero in the morning. By afternoon the temperature rose 16 degrees. How warm was it?

$$12 - 5 + 8 \times 2$$

How many meters are there in 123 kilometers?

How many minutes is it from 9:00 a.m. to 10:30 a.m.?

How much money is 1 quarter, 6 dimes, 1 nickel, and 1 penny?

Write $\frac{2}{4}$ in lowest terms.

Name: _____

At the end of their study of the kinds of electricity, Mrs. Thompson's class completed a quiz on the work they had done. There were twenty-six students in the class. Ten of the students made one hundred on the test, six made ninety, three made eighty, and the rest made seventy. What was the average quiz score for the class?

Justin is 30% Sioux, so when Indian Pudding Day was near, he decided to make enough Indian Pudding for everyone in his class to have half of a cup of pudding. There are twenty-three students in his class, and he would also like to give the same size of pudding to his teacher, the principal, and the basketball coach. How many cups of Indian Pudding will he need to make?

Mrs. Lewis's class is raising money for needy people during October.

Anna saved a quarter for each day of the month to donate.

Billy saved a dime each day. Who collected more money? By how much more?

Rose has 50 cents. What fraction of a dollar is that? Be sure to simplify the fraction.

Name: _____

There are 3 birthdays in our class for the month of September. Alex, Justin, and Jenna all have birthdays. Jenna is the last to celebrate. Her birthday is on the last day of the month. If you add the day numbers of the other birthdays, it equals the day number that Jenna celebrates her birthday. The first person to celebrate is Alex. His birthday is 18 days before the next birthday. On what day numbers are each of their birthdays?

Which is NOT correct? Cross it out.

$$25 \text{ pints} = 3 \text{ gallons}$$

$$72 \text{ inches} = 6 \text{ feet}$$

$$3 \text{ feet} = 1 \text{ yard}$$

$$10 \text{ pints} = 5 \text{ quarts}$$

Name: _____

<p>Yesterday it rained for $4\frac{1}{2}$ hours at Anna's house. She got to use her new pink umbrella. At Ava's house it only rained for 2.3 hours. How much longer did it rain at Anna's house?</p>	<p>Amy had the highest batting average on her team. She won a trophy and a white t-shirt with the team mascot and her name on it. Her batting average was 0.32. Write her batting average as a fraction.</p>	<p>Mary made 10 cookies on Blah Buster Day. She ate $\frac{1}{10}$ of them. Her brother ate 0.2 of the cookies. Her little sister ate $\frac{1}{5}$ of them. How many cookies were left?</p>

word root **agog** can mean **leader**

pedagogue, synagogue

Name: _____

0 • 0 • ÷ • 1 • 4 • 3 • = • 2 • = • 8 • 0 • 3 • 0 • 5 • x • 4
9 • 8 • 6 • x

Use the pieces above to help you fill in the runaway math puzzle.

How many inches are in 5 feet?

_____ inches

$$\begin{array}{r} 486 \\ + 378 \\ \hline \end{array}$$

13 cm = _____ mm

Write 7,945,165 in words.

$$\begin{array}{r} 29 \\ + 47 \\ \hline \end{array}$$

Circle the correctly spelled words.
begger chase, continue
crane, krawl, crewe
manaje, battle, aroze

What time is 16 hours after
4:00 p.m.?

Name: _____

Can you draw ONE line going through ALL the circles? Your line can go left, right, up, or down. It cannot go diagonally. Your line cannot cross over any part of the line you have already drawn.

You MUST TURN in a BLACK circle. Do NOT TURN in a WHITE circle.

The puzzle on the left shows a correct line going through all the circles.

Finish the line:

Finish the line:

$$\begin{array}{r} 63 \\ - 12 \\ \hline \end{array}$$

Circle the digit in the hundredths place.

755.298

Circle the smallest number:

2,371,465,702

2,943

467,893,512,890

6,107,580

Write the missing family fact.

$$71 + 97 = 168$$

$$168 - 97 = 71$$

$$97 + 71 = 168$$

word root **tang** can mean **touch**

tangible, tangle

Name: _____

5 • 4 • 2 • 9 • 2 • ÷ • 1 • 9 • ÷ • x • 5 • 8 • 4 • 3 • = • 3
9 • 7 • 2 • ÷

Use the pieces above to help you fill in the runaway math puzzle.

How many digits are in the current year?

How far do you think it is from your desk to your teacher's desk? Write an estimate of the distance you think it could be.

$$77 \div 7 =$$

$$3 \times 6 =$$

Cross out all of the prepositional phrases in the sentence.

I love playing on your jungle gym!

Write a letter that has a line of symmetry.

Name: _____

Morgan, Taylor, and Mackenzie competed in the women's singles figure skating competition.

Each person has been assigned a technical and presentation ordinal mark. A mark of 1.0 indicated that the person was placed in first place. To determine the winner, the two marks from each judge are added together and assigned an ordinal. In case of a tie, the technical mark has more weight. If there is still a tie, we will allow both people to share the same rank. (Please note that these calculations are simplified from the actual Olympics.)

For the technical ordinal score, the judges give the best performance an ordinal of one. The next best performance receives an ordinal of two, and so on. The presentation ordinal score is assigned in the same way. So for three people, a person could have a presentation ordinal score ranging from 1 to 3.

(When ordinals are compared, a higher ordinal score actually means a lower number. For example an ordinal of 1 is better, and considered higher than an ordinal of 3.)

Figure out the scores for each skater and their final rankings.

1. Taylor had the best technical ordinal score.
2. One skater received a 3 presentation ordinal and a 1 technical ordinal.
3. Taylor's technical ordinal is higher than her presentation ordinal.
4. Mackenzie's technical ordinal score was lower than Morgan's technical ordinal score.
5. One skater received a 3 technical ordinal and a 1 presentation ordinal.
6. Morgan's technical ordinal is equal to her presentation ordinal.

Morgan received a score of _____. Morgan came in _____ place.

Taylor received a score of _____. Taylor came in _____ place.

Mackenzie received a score of _____. Mackenzie came in _____ place.

$$(6 + 8) + 7 =$$

Insert punctuation marks into this sentence.
Alyssa, Amy said, how are you feeling today?

Circle the greatest number:

5,087,126	380,106,539
439,916	2,745

Name: _____

The Daily Dozen Donut Company makes 1,164 donuts every day. How many donuts does the company make in 2 weeks?

On the day the Mystic Magic Museum opened, 4,450 people visited its exhibits. What was the average number of people per hour who visited the museum from its opening at 10:00 a.m. until its close at 6:00 p.m.?

Mr. Wilson estimated that he serves about 45 black cow root beer floats each day. About how many floats did he serve in April?

Name: _____

CHALLENGE YOUR CLASSMATES!
