The school superintendent mixed up four students' attendance records (Sydney, Madison, Brianna, and Eric). The superintendent knows the number of days absent (12, 15, 8, and 17) and the number of days late for each student (12, 16, 4, and 8), but does not know how to match the number of days absent and late with each student.

Figure out how many days each student was late and absent.  
The school was in session for two hundred fifty days.

1. The ratio of Sydney being late to the number of days the school is in session is 2 to 125.
2. The ratio of the number of days Brianna was late to the number of days Eric was late is 3:4.
3. The ratio of Brianna being late to the number of days the school is in session is 6 to 125.
4. The person that was absent twelve days, was late eight days.
5. The ratio of Eric being absent to being in school is 3 to 47.
6. The ratio of the number of absences by Madison to the number of absences by Sydney is 12:17.
