Convert  $39\frac{4}{5}$  to an improper fraction.

A circle graph has four sections. Only three sections are labeled. The labels are 15.19%, 26.84%, and 17.97%. What should the missing section be?

Name: \_\_\_\_\_

It is  $14^{\circ}\text{C}$  outside. How many whole degrees can the temperature rise and still be less than  $26^{\circ}\text{C}$ ?

Barky the clown is giving away lollipops at the circus. He has four different kinds. Now Barky is a mathematically inclined clown (very rare in the circus world), and he likes to give the lollipops away in order such that for every sequence of four lollipops he gives away, he repeats the sequence as few times as possible. How many different sequences are there for Barky to give out his lollipops, assuming he always gives them away in sequences of four different colors in a row each time?

If you take the first number and subtract it by the second, the difference is 12.

What are the two numbers?

$$\begin{array}{r} 0.4 \\ - 0.37 \\ \hline \end{array}$$

$$0.58 + 7.5 =$$

Find the difference between 26.6 and 20.3.
