$$1 + 30 \div 10 \times 4 \times 9 - 4 = \underline{\hspace{2cm}}$$

Name: _____

I am a whole number. When rounded to the nearest ten, the answer is 230. The sum of my digits is 6. What number am I?

In 9 years, Jenna will be two-fourths of Sara's age. Right now the sum of the ages of Sara and Jenna is 48 years. How old is Sara now?

Use ALL of these digits, including the decimal point. Cross off a digit after you use it.

2

.

7

9

Write the closest number that you can to 7.8. Remember to use all the digits and the decimal point.

Name: _____

Ready to make equations? There is a missing equation in each box.
Circle the numbers once you find it!

A

67	62	15
64	98	78
80	27	13
69	60	86

Find an addition fact.

B

93	27	43
29	54	79
60	23	18
9	26	82

Find an addition fact.

C

84	52	39
77	95	40
60	68	65
71	93	37

Find an addition fact.

Equations:

Write the equation facts you found.

A	67	+	13	=	80
B		+		=	27
C		+		=	77

How many centimeters in 7.5 meters?

(32), (16), (8),
_____, (2), (1), $\frac{1}{2}$,
 $\frac{1}{4}$

C, F, I, L, O, _____, U,
X

Round 13,407 to the nearest thousand.

It was 5 degrees below zero in the morning. By afternoon the temperature rose 22 degrees. How warm was it?

W, N, T, M, Q, L, N,
_____, K, J

$11 \times 7 =$ _____

$60 \div 10 =$ _____

word root **ami** can mean **friend**

amigo, amicable

Name: _____

Megan, Mackenzie, Samantha, and Grace competed in the women's singles figure skating competition.

Each person has been assigned a technical and presentation ordinal mark. A mark of 1.0 indicated that the person was placed in first place. To determine the winner, the two marks from each judge are added together and assigned an ordinal. In case of a tie, the technical mark has more weight. If there is still a tie, we will allow both people to share the same rank. (Please note that these calculations are simplified from the actual Olympics.)

For the technical ordinal score, the judges give the best performance an ordinal of one. The next best performance receives an ordinal of two, and so on. The presentation ordinal score is assigned in the same way. So for four people, a person could have a presentation ordinal score ranging from 1 to 4.

(When ordinals are compared, a higher ordinal score actually means a lower number. For example an ordinal of 1 is better, and considered higher than an ordinal of 3.)

Figure out the scores for each skater and their final rankings.

1. One skater received a 2 presentation ordinal and a 1 technical ordinal.
2. Megan had the best technical ordinal score.
3. Grace's technical ordinal score was lower than Samantha's and lower than Mackenzie's.
4. Grace did not have a presentation ordinal mark of 4.
5. Samantha's technical ordinal score was higher than Mackenzie's technical ordinal score.
6. Grace's technical ordinal is lower than her presentation ordinal.
7. Mackenzie's technical ordinal is higher than her presentation ordinal.
8. One skater received a 2 technical ordinal and a 3 presentation ordinal.

Megan received a score of _____. Megan came in _____ place.

Mackenzie received a score of _____. Mackenzie came in _____ place.

Samantha received a score of _____. Samantha came in _____ place.

Grace received a score of _____. Grace came in _____ place.

Name: _____

Fill in each box of the edHelperKu puzzle, using the numbers from 1 to 6.

Every row must contain the numbers 1, 2, 3, 4, 5, and 6.

Every column must contain the numbers 1, 2, 3, 4, 5, and 6.

In a cage with a subtraction sign, the given number will be the difference. The largest number will always be the box with the clue.

3	2-	1- 2	4-		3-
4-	2		2-		
	2-	1-	2	3	3- 4
2-			2-		
	3-		1	3-	
1-		1-		1-	

Fill in the blanks. These equations are from the puzzle above.

$$\underline{\quad} - 5 = 1$$

$$\underline{\quad} - 2 = 2$$

$$\underline{\quad} - 2 = 3$$

$$5 - \underline{\quad} = 2$$

$$\underline{\quad} - 1 = 1$$

$$6 - \underline{\quad} = 2$$

$$5 - \underline{\quad} = 4$$

$$4 - \underline{\quad} = 3$$
